PROFILE SUMMARY

With over six years of experience in Golang, PHP, Laravel, Node.js, and Python, I am a specialized Backend Developer with a solid commitment to code quality, consistently maintaining a minimum of 80% test case coverage. My expertise, grounded in a solid academic foundation and extensive IT training, enabled me to resolve a critical issue within weeks, preventing a \$31,000 loss for the organization. Seeking a new opportunity to apply my skills in optimizing business processes, driving revenue growth, and enhancing system efficiency.

SKILLS

Protocols : JSON, RESTfulAPI, gRPC, Apache Kafka, Amazon SQS
Frontend : Flutter, React Native / JS, HTML 5, CSS 3, Javascript, Bootstrap
Backend : Golang, Java, Node.JS, PHP, Python, R, Typescript, OOP, MVC
RDBMS : MySQL, PostgreSQL, SQLite, SQL Server
NoSQL : MongoDB, Redis, CSV
DevOps : Git, CI/CD, Docker, AWS, Google Cloud, Azure
OS : Cloudlinux, Ubuntu, Debian, MacOS, Windows

Soft Skills : Problem-Solving, Organized, Fast Learner, Time Management, Teamwork, Communication, Mentoring, Collaboration

PROFESSIONAL EXPERIENCE

KOINWORKS (PT.Lunaria Annua Teknologi) - Fintech

Fullstack Engineer (2022 - present)

- Develop, test and maintain a robust P2P Lending application, ensuring seamless borrower backend functionality with response time under 300ms response time and rigorous KYC (Know Your Customer) verification protocols.
- Build neo banking backend application, overseeing critical processes such as transaction management, Top Up/Money In, QRIS, Interbank transfers, and foreign exchange transactions.
- Implemented comprehensive monitoring and investigation protocols to detect and mitigate abuse transactions, identify anomalies and potential fraud profiles, and actively addressed technical issues within banking processes, taking decisive action to safeguard the platform's integrity.
- Engineered automation solutions system for the Transaction Risk Management System, enhancing efficiency and accuracy in monitoring applications.
- Maintained high code quality to ensure system robustness and stability by enforcing standards such as removing unused logs, achieving endpoint response times under 300ms, maintaining over 80% unit test coverage, and adhering to clean code practices.
- Maintain system incidents, demonstrating expert problem-solving skills to ensure minimal disruption and rapid resolution.
- Identified and resolved production bugs and issues by analyzing root causes and implementing effective solutions

REZAYOTECH (PT. Artha Patria Indotechno) - IT Solutions

Tech Lead (2020-2022)

- Figure the technical objectives across our projects, aligning them with project goals. Through comprehensive evaluation of diverse factors and collaborative discussions with stakeholders, we ensure that our decisions are well-informed, guiding our teams toward the optimal routes for success.
- Led cross-functional project teams, leveraging their diverse skills and knowledge to achieve ambitious project goals and exceed expectations, transforming challenges into opportunities and building an environment where success was not just achieved but celebrated.
- Executed forward-thinking initiatives and developed an environment where every team member could realize their capabilities and channel their creativity towards achieving exceptional results.

QUANTUM (PT.Quantum HRM Internasional) - HR Development

Senior Web Developer (2019-2021)

- Engineered robust monolithic and microservice web applications tailored to the company's specific needs, leveraging the versatility of PHP programming language and the reliability of MySQL database.
- Developed and maintained dynamic web applications for psychological tests and professor certification applications, delivering seamless processes and compliance with industry standards.
- Implemented proactive SEO and AB testing strategies, strategically enhancing web company engagement and optimizing performance to maximize impact and visibility.

TRANSCON (PT.Transcon Indonesia) - Logistics and Transportation

Web Programmer (2018-2019)

- Developed and oversaw a comprehensive HR application, facilitating seamless employee registration, attendance tracking, annual leave management, bonus distribution, permissions, and reimbursements with precision and efficiency.
- Provided the seamless operation of PLB & TPP web applications, overseeing client registration, management, booking, and other crucial functions, guaranteeing a smooth and hassle-free experience for clients and stakeholders.
- Managed and supervised the direct operations, monitoring, and performance evaluation of operational applications to uphold performance standards and synchronize with company goals.

PROFESSIONAL ACCOMPLISHMENT

- Implemented High Standards for Code Quality**
Using tools like ESLint, Prettier, and SonarQube to maintain a high level of code quality. This initiative led to a significant reduction in bugs and technical debt, improving overall maintainability and readability of the codebase.
- Optimized Microservices Communication with gRPC and API Protocols**
Improved the efficiency and reliability of microservices communication by implementing gRPC alongside traditional RESTful APIs. This approach streamlined data exchange, reduced latency, and ensured seamless interoperability between services, resulting in a more scalable system.
- Migrated Legacy System to Modern Tech Stack**
Spearheaded the migration of a legacy PHP application to the Laravel framework, modernizing the codebase and incorporating best practices for security and performance. This migration not only enhanced the application's maintainability but also improved security by addressing vulnerabilities and implementing robust authentication and authorization mechanisms.
- Automated Testing Suite Implementation**
Developed a comprehensive automated testing suite using tools like Jest, Mocha, and Selenium, which covered unit, integration, and end-to-end tests. This initiative reduced manual testing efforts by 70% and increased the reliability of software releases.
- Led a Major Application Product Launch**
Successfully led the launch of a major application that automated and reduced manual tasks by 80%, resulting in significant cost savings for the company. Coordinated efforts across development, and operations teams to ensure a smooth and timely release.
- Drove Technical Strategy and Vision**
Developed and communicated a clear technical strategy that aligned engineering efforts with business objectives. This vision was instrumental in guiding the team's work on key projects and contributed to the company's overall growth and success.
- Achieved High Customer Satisfaction Scores Through Product Quality**
Prioritized product quality and customer feedback, leading to a significant improvement in customer satisfaction scores. The focus on delivering high-quality software and strengthened the company's reputation for reliability.

PORTFOLIO

- Personal Website - Giofahreza
<https://giofahreza.com>
Developed and maintain a personal website that showcases my skills, projects, and professional experience as a full-stack engineer. The website serves as a comprehensive digital portfolio, reflecting my capabilities in fullstack engineer.
- Corporate Website for the Indonesian Pawnbrokers Association - perkumpulan-perusahaan-gadai.com
<https://perkumpulan-perusahaan-gadai.com/>
Designed and developed the official website for the Indonesian Pawnbrokers Association, serving as a central hub for members, stakeholders, and the public. Key features include:
 - Member Directory: A searchable directory of all registered pawnbroker companies in Indonesia, allowing users to easily find and connect with reputable services.
 - News & Updates: Regularly updated sections featuring the latest news, industry developments, and regulatory updates relevant to pawnbrokers.
 - Resource Center: A comprehensive library of resources, including legal guidelines, industry reports, and educational materials to support members.
 - User-Friendly Interface: Focused on creating an intuitive and accessible user experience, ensuring that visitors can easily navigate and find relevant information.This project demonstrates my ability to deliver high-quality, user-centric websites tailored to the specific needs of industry organizations.
