## PROFESSIONAL EXPERIENCE

### KOINWORKS (PT.Lunaria Annua Teknologi)

*Fullstack Engineer*                                                                                                                                 *2023-Present*

Develop P2P Lending application :
- Spearheaded the development of a robust P2P Lending application, ensuring seamless borrower backend functionality and rigorous KYC (Know Your Customer) verification protocols.

Develop banking application :
- Led the creation and refinement of a sophisticated banking application, overseeing critical processes such as transaction management, Top Up/Money In, QRIS, Interbank transfers, and foreign exchange transactions.
- Proactively addressed technical issues within banking processes, offering swift resolution and continuous support to optimize system performance.
- Implemented comprehensive monitoring and investigation protocols to detect and mitigate abuse transactions, identifying anomalies and potential fraud profiles, and taking decisive action to safeguard the integrity of the platform.

*TechOps Engineer*                                                                                                                                          *2022-2023*

Develop automation for Transaction Risk Management System :
- Engineered automation solutions for the Transaction Risk Management System, enhancing efficiency and accuracy in monitoring critical applications.
- Served as the primary point of contact during system incidents, demonstrating expert problem-solving skills to ensure minimal disruption and rapid resolution.

### REZAYOTECH

*Tech Lead*                                                                                                                                                           *2020-2022*

- Championed dynamic project teams, harnessing their collective expertise to deliver groundbreaking solutions that pushed the boundaries of innovation.
- Orchestrated and inspired high-performing teams, driving collaboration and creativity to achieve ambitious project goals and exceed expectations.
- Spearheaded the execution of visionary projects, guiding each team member to unlock their full potential and unleash their creativity in pursuit of excellence.
- Led with passion and determination, transforming challenges into opportunities and cultivating an environment where success was not just achieved but celebrated.

*Fullstack Developer*                                                                                                                                         *2017-2019*

- Transformed client design assets into captivating mobile applications using React Native, ensuring seamless functionality and stunning user experiences.
- Crafted responsive web applications and websites from client specifications, utilizing the latest HTML, CSS, and JavaScript techniques to deliver visually compelling and highly interactive experiences.
- Engineered robust web applications and components using the PHP programming language and MySQL database, blending creativity with technical prowess to create dynamic and efficient solutions.
- Delivered cutting-edge mobile applications with React Native frontend, seamlessly integrated with PHP backend and MySQL databases, combining innovation with reliability for optimal user engagement and satisfaction.
- Spearheaded the development and implementation of advanced SEO and AB testing strategies, driving significant improvements in marketing effectiveness and enhancing brand visibility and engagement.

### QUANTUM (PT.Quantum HRM Internasional)

*Senior Web Developer*                                                                                                                                   *2019-2021*

- Pioneered cutting-edge technology research initiatives to drive innovation and meet evolving company requirements, ensuring a competitive edge in the market.
- Engineered robust monolithic and microservice web applications tailored to the specific needs of the company, leveraging the versatility of PHP programming language and the reliability of MySQL database.
- Spearheaded the development and maintenance of dynamic web applications for professor certification and recertification, ensuring seamless processes and compliance with industry standards.
- Orchestrated the creation and upkeep of sophisticated psychological test web applications, delivering invaluable tools for assessment and analysis in the field.
- Implemented proactive SEO and AB testing strategies, strategically enhancing web company engagement and optimizing performance to maximize impact and visibility.

### TRANSCON (PT.Transcon Indonesia)

*Web Programmer*                                                                                                                                              *2018-2019*

- Develop and oversee a comprehensive HR web application, facilitating seamless employee registration, attendance tracking, annual leave management, bonus distribution, permissions, and reimbursements with precision and efficiency.
- Ensure the seamless operation of PLB & TPP web applications, overseeing client registration, management, booking, and other crucial functions, guaranteeing a smooth and hassle-free experience for clients and stakeholders alike.
