PROFILE SUMMARY

With over six years of experience in Golang, PHP, Laravel, Node.js, and Python, specialized Backend Developer combined with a solid academic foundation and extensive training in information technology. Within a few weeks, effectively resolved a substantial issue and averted a $31,000 loss for the organization. Possessing a solid background in backend development and an unwavering dedication to ongoing enhancement, I am currently looking for a new opportunity to showcase outstanding business processes that facilitate the streamlining of systems, thereby fostering revenue growth and streamlined procedures.

SKILLS

Backend : Golang, Java, Node.JS, PHP, Python, R, Typescript, JSON, OOP, MVC, RESTfulAPI, gRPC, Kafka, SQS
Database : MySQL, PostgreSQL, SQLite, SQL Server, MongoDB, Redis
Frontend : Flutter, React Native / JS, HTML 5, CSS 3, Javascript, Bootstrap
DevOps : Git, CI/CD, Docker, AWS, Google Cloud, Azure, Linux
Soft Skills : Problem-Solving, Organized, Fast Learner, Time Management, Teamwork, Communication, Mentoring, Collaboration

PROFESSIONAL EXPERIENCE

KOINWORKS (PT.Lunaria Annua Teknologi)

Fullstack Engineer   *2023 - present*
- Develop and maintain a robust P2P Lending application, ensuring seamless borrower backend functionality with <300ms response time and rigorous KYC (Know Your Customer) verification protocols.
- Build neo banking backend application, overseeing critical processes such as transaction management, Top Up/Money In, QRIS, Interbank transfers, and foreign exchange transactions.
- Implemented comprehensive monitoring and investigation protocols to detect and mitigate abuse transactions, identify anomalies and potential fraud profiles, and actively addressed technical issues within banking processes, taking decisive action to safeguard the platform's integrity.

TechOps Engineer   *2022-2023*
Develop automation for Transaction Risk Management System :
- Engineered automation solutions system for the Transaction Risk Management System, enhancing efficiency and accuracy in monitoring applications.
- Maintain system incidents, demonstrating expert problem-solving skills to ensure minimal disruption and rapid resolution.
- Assist the development team in identifying and resolving bugs or issues from incidents.

REZAYOTECH

Tech Lead   *2020-2022*
- Figure the technical objectives across our projects, aligning them with project goals. Through comprehensive evaluation of diverse factors and collaborative discussions with stakeholders, we ensure that our decisions are well-informed, guiding our teams toward the optimal routes for success.
- Led cross-functional project teams, leveraging their diverse skills and knowledge to achieve ambitious project goals and exceed expectations, transforming challenges into opportunities and building an environment where success was not just achieved but celebrated.
- Implementing forward-thinking initiatives, developing an environment where every team member could realize their capabilities and channel their creativity towards achieving exceptional results.

Fullstack Developer   *2017-2019*
- Transformed client design assets into captivating mobile applications using React Native, ensuring seamless functionality and stunning user experiences. Seamlessly integrated with the backend system, combining innovation with reliability for optimal user engagement and satisfaction.
- Engineered responsive web applications for client requirements, utilizing the latest HTML, CSS, and JavaScript to deliver visually compelling and highly interactive experiences. I also use the PHP programming language and MySQL database, blending creativity with technical prowess to create dynamic and efficient solutions.
- Spearheaded development and implementation of advanced SEO and AB testing strategies, driving significant improvements in marketing effectiveness and enhancing brand visibility and engagement.

QUANTUM (PT.Quantum HRM Internasional)

Senior Web Developer   *2019-2021*
- Engineered robust monolithic and microservice web applications tailored to the company's specific needs, leveraging the versatility of PHP programming language and the reliability of MySQL database.
- Develop and maintain dynamic web applications for psychological tests and professor certification applications, delivering seamless processes and compliance with industry standards.
- Implemented proactive SEO and AB testing strategies, strategically enhancing web company engagement and optimizing performance to maximize impact and visibility.

TRANSCON (PT.Transcon Indonesia)

Web Programmer   *2018-2019*
- Develop and oversee a comprehensive HR application, facilitating seamless employee registration, attendance tracking, annual leave management, bonus distribution, permissions, and reimbursements with precision and efficiency.
- Ensure the seamless operation of PLB & TPP web applications, overseeing client registration, management, booking, and other crucial functions, guaranteeing a smooth and hassle-free experience for clients and stakeholders.
- Manage and supervise the direct operations, monitoring, and performance evaluation of operational applications to uphold performance standards and synchronize with company goals.
